

A

Distribution of mean homogeneity scores for orthogroups

Scores were calculated based on *A. thaliana* genes

B

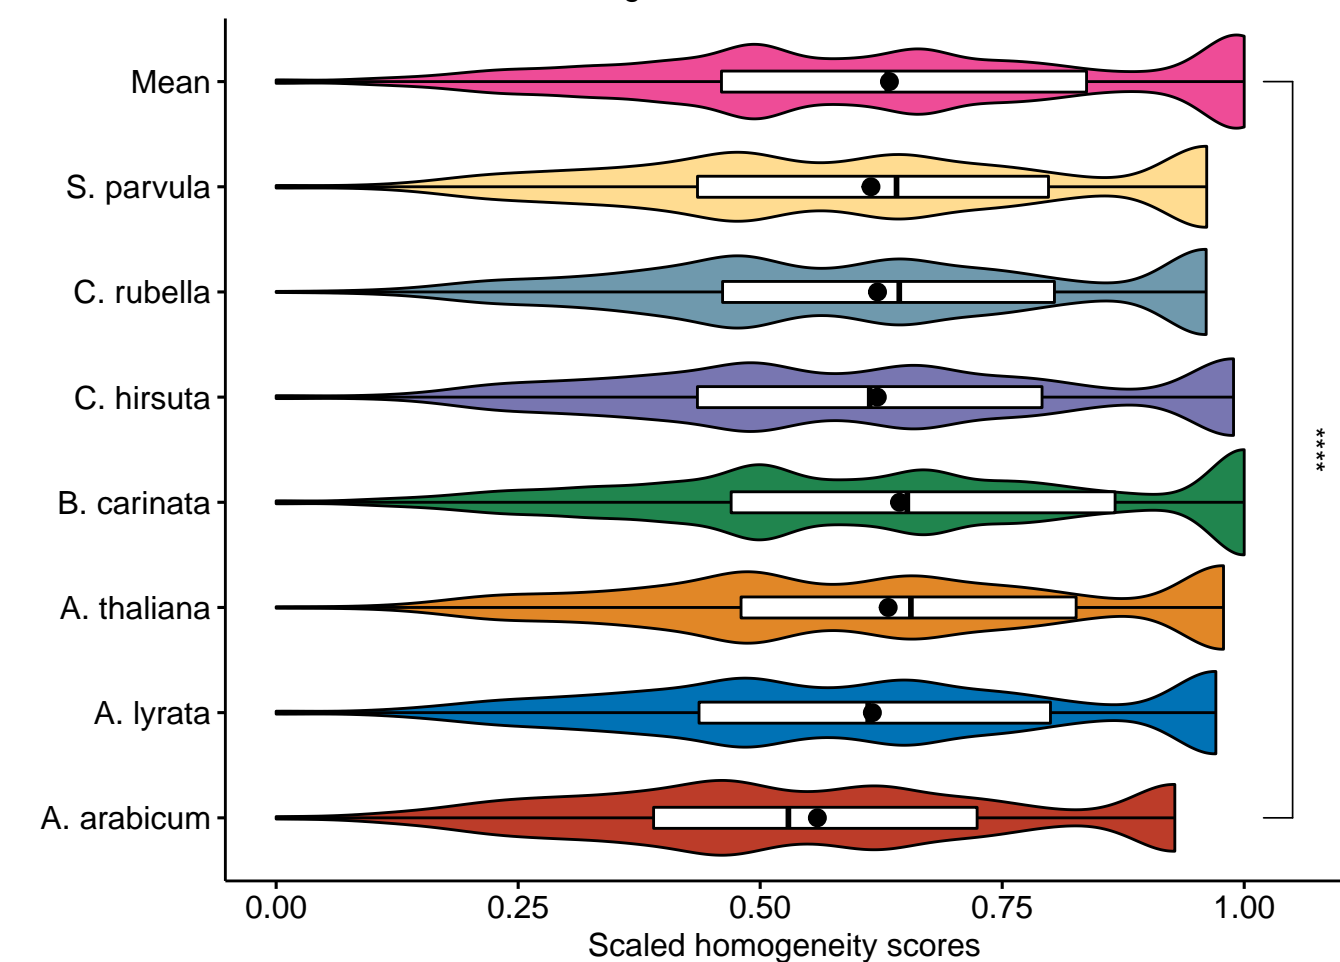

Distribution of mean homogeneity scores for orthogroups

C

Distribution of mean homogeneity scores per species

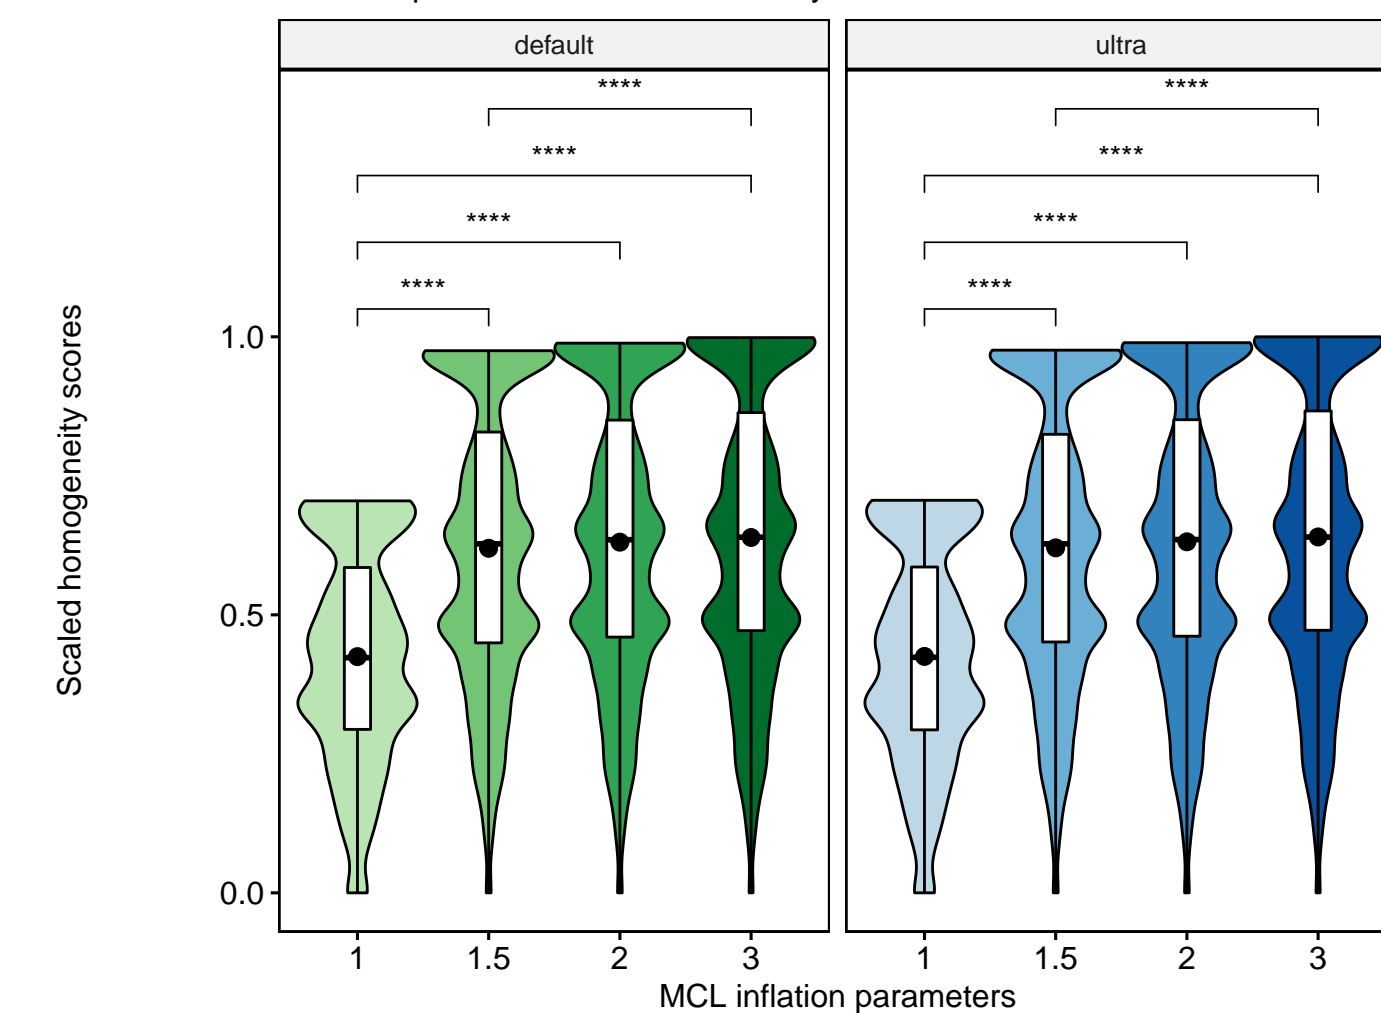

Scores were calculated using the default OrthoFinder mode

D

Effect of MCL inflation values on orthogroup inference

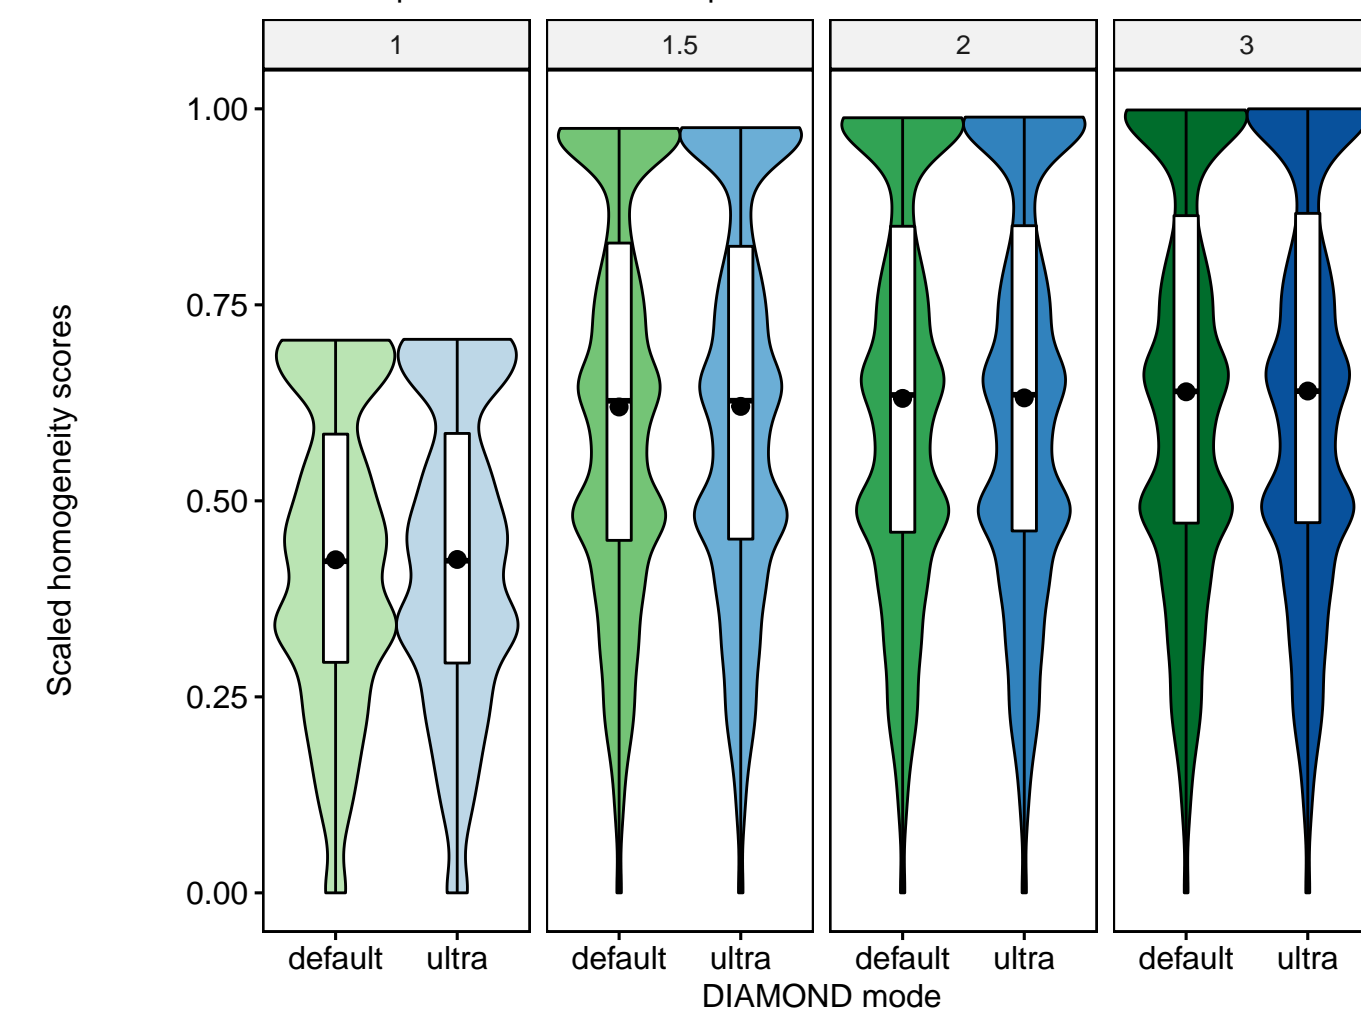

Panels represent DIAMOND sensitivity modes

E

Effect of DIAMOND mode on orthogroup inference

Panels represent MCL inflation parameters

F

Relationship between OG homogeneity and gene length
